

K-10-SPe

Portable thermal fogger with electric start

- Portable and lightweight fogging unit, with electric engine start.
- Integrated rechargeable 12V Lithium battery.
- Battery management system, to avoid full discharge, overcharge and short circuit.
- Over 200 engine starts with one battery charge.
- Battery SOC and voltage display (optional feature).
- Easy recharging with adaptor connected to regular power outlet.
- Recharging time of about 2 hours.
- Powerful and efficient pulse-jet resonator.
- Sturdy and reliable design for operation under heavy duty conditions.
- Easy maintenance and permanent availability of spare parts.
- For applications in hygiene (disinfection), crop protection, pest control (PC) and public health (PH), among others.

Technical Data

Fogging solution tank	5 L
Petrol tank	1,9 L
Size (length x breadth x height)	106 x 29 x 33 cm
Empty weight	7,1 kg
Maximum engine power	17,8 kW (24,1 hp, 15.300 kcal/h)
Maximum flow rate	35 L/h (maximum)
Fuel consumption	1,9 L/h
Engine start	Electric (12 VDC, 2 Ah battery)
