pulsFOG®

The pulsFOG BIO System provides the following advantages

- The successful application of heat sensitive biological ingredients (Bacillus thuringiensis, Juvenile hormones, Beauveria bassiana, Neem tree oil) and other chemical substances.
- The fogging of wettable powder formulations without choking and clogging the outlet of resonator.
- The avoidance of fire hazard with highly combustible fogging liquids.

K-30-20-BIO

STATIONARY THERMAL FOGGER

LARGE TUBULAR FRAME // CONTROL PANEL

Empty weight	45 kg
Wooden case (length x breadth x height)	160 x 97 x 77 cm
Capacity of solution tank	2 x 55 litres (square version) made of polyethylene
Capacity of fuel tank	20 litres
Cubic capacity of engine	2000 cm ³
Max. performance of engine	75 kW (101,6 hp, 64.400 kcal/h)
Max. fuel consumption	7,6 l/h
Automatic ignition	Electronic ignition coil fed by 4 x dry batteries = 6V
Standard starting device	Manual start
Flow rate	30 - 190 l/h (according to nozzle size used)
Standard flow rate	80 l/h
Droplet size spectrum (depending on oil viscosity and nozzle size used)	< 25 µm (oil) / < 60 µm (oil/water) / < 150 µm (water)
Optional	<ul style="list-style-type: none">• Electrical starting device• Remote control including automatic cut-off device and manual start• Turntable

FOGGING TECHNIQUE AND APPLICATION

Thermal fogging is the generation of ultra-fine droplets in a range of 1-50 µm using thermo-pneumatic energy. Liquid substances are vaporized in the unit and form ultra-fine aerosols by condensing on contact with cool ambient air. Thermal fogging is used for any pest control task where active substances should be uniformly distributed even in inaccessible places, without leaving undesirable residues.

The fogging technique is the solution for treating large areas and spaces with a minimum quantity of pesticide solution, less operational work and with little harm to the environment (less residues, no penetration into the ground), e.g. in the field of public health, stock protection, plant protection, disinfection, decontamination, deodorization and cinema effects.
